

NEW TECNOFIRE PRICE LIST 1.0

Tecnofire is releasing a new version of its price list:

Effective from February 1, 2024 – Version 1.0

Despite the volatility of raw material costs, Tecnofire has reduced prices for several product families, maintained stable prices for others, and adjusted only the gas detection product range due to supplier cost increases. A formal quotation request is always recommended for the products of interest.

*To request a meeting and obtain the new price list, please contact your local sales engineer or write to: **info@tecnofiredetection.com***
