

## INNOVATIVE, HIGH-QUALITY VOICE EVACUATION DEVICES

### Did you know that Tecnofire offers voice evacuation solutions?

To meet the increasingly frequent requests from industry professionals for effective integrated fire detection and voice evacuation solutions, today Tecnofire includes fire detection and **EVAC** equipment among its already extensive product range, relying on leading partners such as **RCF** and **LDA Audio Tech**.

**Tecnofire offers a comprehensive service that ranges from design support to the study of the best technical solution, supply and configuration, after-sales support included.**

The voice evacuation systems chosen by Tecnofire comply with the **EN 54-16** and **EN 54-24 standards** and their use is ideal, for instance, in **public and commercial buildings** or **industrial plants**, where they facilitate rapid and orderly evacuation in emergency situations.

Thanks to the technical and regulatory expertise of the Tecnofire sales representatives, the choice of these products becomes a **high-quality solution** which **guarantees total reliability** and **efficiency**.

The quality of the service offered is also supported by the **active participation of Tecnofire employees** in the **UNI working groups** for the drafting of **standards** and, especially, the **new UNI 11988 standard**: "Design, Installation, Commissioning, Use and Maintenance of Voice Alarm Systems for Emergency Purposes Serving Fire Detection Systems."
